Summit CROS System

Hearing solutions for single-sided hearing loss

microtech

Made for single-sided *hearing loss*

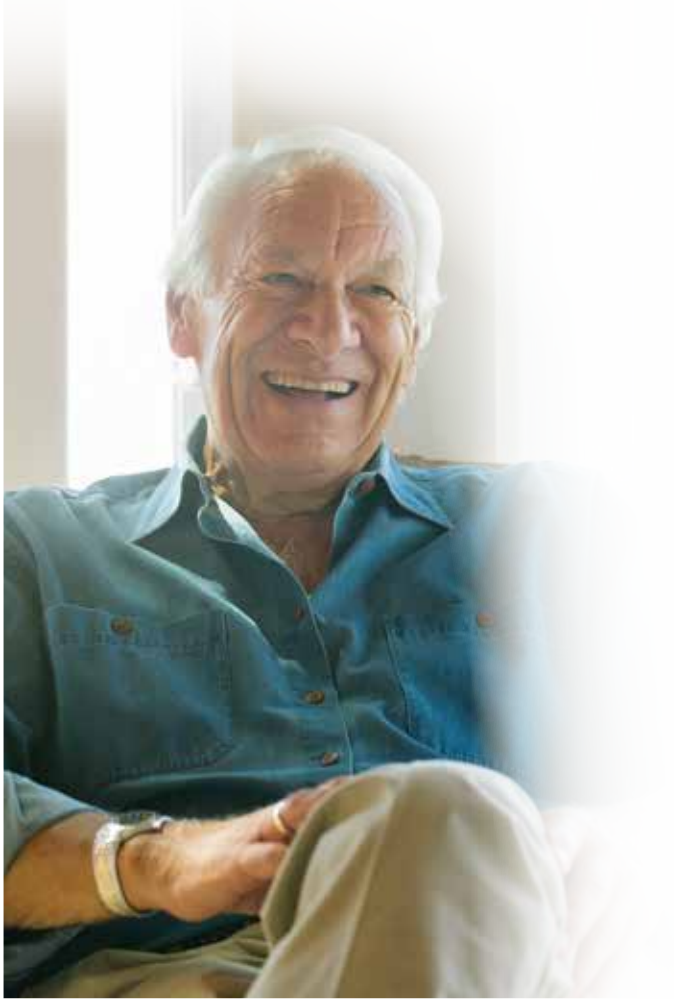
With our new line of Summit™ hearing aids, MicroTech™ has a solution for those with single-sided hearing loss.

MicroTech can help you surround yourself with the power of superior sound.

MicroTech has cutting edge technology that delivers true listening enjoyment.

The Summit CROS System

The new Summit CROS System was developed to give more people solutions for better hearing.



Now, if you have single-sided hearing loss you'll be able to hear the world around you – in full, pristine sound.

Summit CROS System benefits:

1. ***Improves listening in noise***
2. ***Reduces background noise***
3. ***Decreases echoes and reverberating sounds***
4. ***Allows you to hear from both sides — with devices so small and discreet they're nearly invisible***

Customized *solutions*

CROS solution

If you're unable to hear in one ear and have normal hearing in the other ear, you may benefit from a CROS solution. Finally, you'll be able to hear sounds in your weaker-hearing ear by way of your healthy ear.

How it works

To help you better engage in all types of listening environments, our CROS solution has a microphone that picks up sounds and voices from your weaker-hearing ear, then transmits them to a hearing aid receiver that's fitted on your good ear. No matter your position at the dinner table, or if sounds originate from your weaker-hearing side, you won't miss important sounds around you.

Also available with

BiCROS solution

A BiCROS solution is also available and can benefit those with little to no hearing in one of their ears, and a hearing loss in their better ear.

How it works

This option sends sound from a microphone, placed in your ear with little to no hearing, to a hearing aid receiver placed in your better-hearing ear. This allows you to hear from both sides. Your hearing care professional can help you determine what solution will best fit your needs and lifestyle.

Made to deliver *the very best.*

You want	Summit delivers
To hear comfortably in challenging environments	**Acuity™ Directionality** is designed to improve speech audibility in difficult listening situations along with **Speech Shift**.
To easily adapt to new sounds	This feature speeds your transition to hearing aids by gradually adjusting settings to allow your brain to get used to new sounds.
Better wireless streaming	Technology that provides consistent wireless performance while streaming TV, music and other media with SurfLink® Mobile 2 and other SurfLink accessories.
Natural one-on-one conversations	The all-new SurfLink Remote Microphone is a discreet, lightweight microphone worn by a conversation partner to aid patients in one-on-one conversations in difficult listening environments.
A comfortable, personalized listening experience	Sound comfort technology designed to provide distortion-free listening comfort for loud sounds while ensuring ultimate clarity for soft sounds.
No buzzing or whistling	MicroTech's best-in-class feedback cancellation system providing feedback-free, comfortable listening all day long.
Durable, dependable hearing aids	**Surface™ NanoShield**, our pioneering water, wax and moisture repellent system, to protect and ensure durability and dependability.
Music the way it was meant to be heard	Summit is designed to allow you to experience music in a whole new way. Now you can hear every note the way the artist intended – with pure, refined sound quality.
Customizable tinnitus relief	Advanced **Multiflex Tinnitus Technology** integrated into Summit to bring relief to those who suffer from ringing in the ears.

Features may vary by technology level.

Made for *everywhere* you are.

From the beginning, our hearing solutions have enabled people to hear better in difficult environments and live a better life.

You want to hear all the subtleties of life: the inflection in the voice of a spouse or the nuances in the notes of a favorite song. Whether it's one-on-one or in the most crowded places, you'll hear the world around you.

What is your hearing lifestyle?

Our lineup of products enhances many different listening environments. What you need depends on your lifestyle and how active you are.

Compare the listening environments on the chart inside.
